UMED ALI KEERIO

AI/ML Engineer • Generative AI • Software Engineering Graduate

keerioumaidali@gmail.com | +92 316 327 1941 | linkedin.com/in/umed-ali-keerio | github.com/UmedAli123

EDUCATION

BSc Software Engineering *Mar 2022 – Jun 2026*

Core areas: Database Management Systems, Data Structures & Algorithms, Computer Networks, Information Security, Artificial Intelligence, Functional Programming, and Software Engineering — building a strong foundation applicable across real-world software and AI development.

CAREER OBJECTIVE

Fresh Software Engineering graduate with strong hands-on experience in AI/ML, deep learning, and Generative AI. Seeking a full-time role where I can apply my technical skills in building intelligent systems, NLP pipelines, and automation workflows. Passionate about delivering real-world impact through scalable, well-engineered AI solutions.

EXPERIENCE

AI/ML & GenAI Developer (Freelance) — **Fiverr** | *Feb 2025 – Apr 2026*

- Delivered 20+ AI/ML projects to international clients covering NLP, computer vision, and Generative AI
- Built RAG pipelines, LLM-powered chatbots, and AI agents using LangChain and LlamaIndex
- Developed n8n automation workflows integrating AI APIs, webhooks, and third-party services
- Gained practical exposure to client requirements, technical documentation, and production deployment

Machine Learning Intern — **Technocolabs Softwares** | *Nov 2022 – Feb 2023*

- Completed supervised and unsupervised ML tasks including data preprocessing, feature engineering, and model evaluation
- Collaborated in a professional team environment on applied machine learning projects
- Strengthened problem-solving skills and exposure to real-world ML workflows

KEY PROJECTS

Rice Plant Disease Detection — *Final Year Project*

- Developed a CNN-based classification system (128×128px) detecting Bacterial Leaf Blight, Brown Spot, and Leaf Smut with 94%+ accuracy
- Built full-stack deployment with Flask and Streamlit: login/auth, side-by-side image comparison, glassmorphism UI
- Integrated educational disease info, session state management, and reset flow for smooth UX

PolyGuard AI — *Real-Time Semantic & Code Similarity Analyzer*

Tech Stack: React.js, FastAPI, Sentence-Transformers, AST, RoBERTa

- Implemented cross-lingual semantic plagiarism detection across 50+ languages using paraphrase-multilingual-MiniLM embeddings
- Engineered an AST-based engine to detect logic cloning in Python, JavaScript, and C++, going beyond text matching
- Integrated AI-generated content detection (RoBERTa) to identify LLM-produced text from GPT-3/GPT-4
- Designed a premium glassmorphic dashboard with real-time risk assessment and similarity highlighting

MediIntel AI — *Intelligent Medical Diagnosis & Explainable AI (XAI)*

Tech Stack: React.js, Flask, SpaCy, SHAP, Scikit-learn, JWT

- Developed a smart NLP pipeline using SpaCy for automated symptom extraction from patient narratives
- Integrated SHAP-based Explainable AI to provide clinical transparency — revealing exactly which symptoms drove each diagnosis
- Implemented JWT-based authentication with role-based access control for Doctors and Patients
- Built an interactive health analytics dashboard for tracking longitudinal patient data and disease trends

Sentiment Analysis System — *MovieSent*

- Dual-model approach: LSTM + Logistic Regression for movie review sentiment classification
- Flask backend with user login/registration; achieved ~99% accuracy; deployed as a production-grade API

Brain Tumor Classification & Radiology Report Generation

- Built a deep learning pipeline using ResNet101 for MRI-based brain tumor classification combined with T5 for automated radiology report generation
- Delivered an end-to-end system bridging computer vision with natural language generation

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL, HTML/CSS, Haskell
AI/ML Frameworks: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Hugging Face Transformers, NLTK, Pandas, NumPy
Generative AI: LangChain, LlamaIndex, RAG Pipelines, Prompt Engineering, Fine-tuning (LoRA/QLoRA), GPT-4, Claude API, Gemini
Automation & Tools: n8n workflow automation, API integrations, Webhooks, Flask, Streamlit, FastAPI, Docker, Git, Linux
Soft Skills: English & Urdu (bilingual), client communication, teamwork, adaptability, problem-solving

CERTIFICATIONS

- Neural Networks & Deep Learning — Analytics Vidhya
- Fine-tune BERT for Text Classification — Coursera (Verified)
- Machine Learning — Analytics Vidhya
- Hands-on Computer Vision with OpenCV & TensorFlow — Udemy
- Python for Data Science and Machine Learning Bootcamp — Udemy
- Machine Learning Internship Certificate — Technocolabs Softwares
